

Twinning Romania Project

**“Specific support for Implementation of 96/82/EC Directive (Seveso II) and 2003/105/EC Directive”, Ministry of Interior and Administrative Reform
General Inspectorate for Emergency Situations**

Project Value: €240,000

Duration: May-December 2009

The project aims at assisting Romania in effectively implementing and strengthening the requirements of the 96/82/EC (Seveso II) and 2003/105/EC Directives, through **the improvement of the administrative structure and of the institutional capacities of the Ministry of the Interior and Administrative Reform**. Moreover, the project also aims at **supporting the operators that deal with the implementation of the Seveso Directive** in the development of a safe and effective management system.

CSI-Piemonte actively contributed to the preparation of the candidacy dossier, on the basis of its experience on the SIRA (Shared Environmental Information System) and most of all on SIAR (Information System on Relevant Risk Activities) projects for the Piedmont Region. CSI-Piemonte candidate in the project team some resources skilled on the subject.

CSI-Piemonte experts, in their consultancy missions in Romania, will provide qualified support to help the beneficiary in the definition of the implementation of the requirements of the 96/82/EC (Seveso II) and 2003/105/EC Directives.
